Formulating the future™

**INNOVOH®**

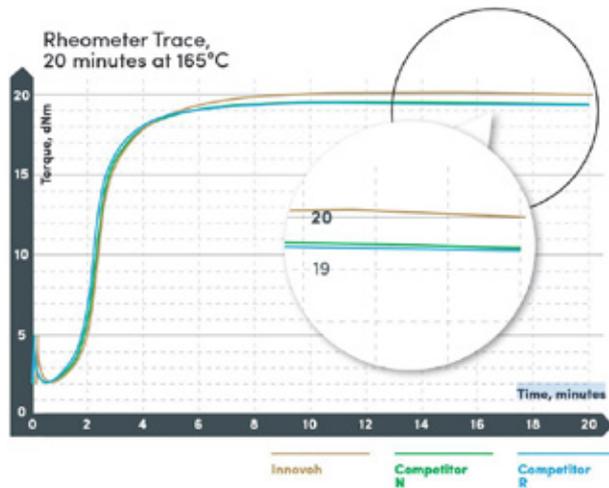

Improve the quality of  
FKM Fluoroelastomers

with Ultrafine Cure Additive Innovoh

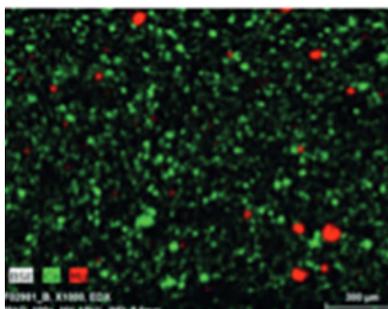

# Improve the quality of FKM Fluoroelastomers

with Ultrafine Cure Additive Innovoh

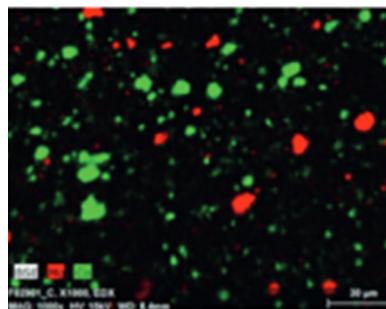

Innovoh gives exceptional cure performance and dispersion.

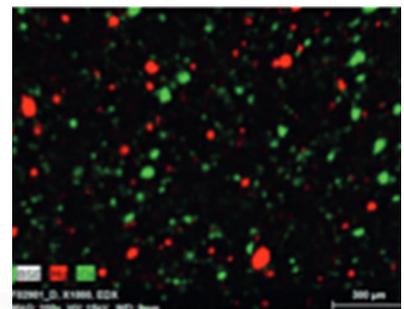

When compared to leading competitors, the Innovoh advantage is easy to see.

Innovoh Dispersion

Competitor N dispersion

Competitor R dispersion

# Improve the quality of FKM Fluoroelastomers

with Ultrafine Cure Additive Innovoh

Improve the performance and consistency of your finished product with our unrivalled microfine calcium hydroxide cure additive and activator, Innovoh.

Tailored for FKM rubbers and fluoroelastomers, Innovoh benefits from Birch Chemicals' unique integrated supply chain, with 100% of the raw materials for Innovoh being produced and refined on-site for unrivalled quality control.

Thanks to Innovoh's formulation, it disperses easily and evenly throughout the product mix for consistent results whatever the application. And because Innovoh is high-purity, with a high surface area, it delivers a superior cure, leading to improved cross-link density and strength, along with consistently higher FKM quality. Its high surface area also means that it's easy to reduce addition levels - without sacrificing a high-quality final result.

## Use Less

Use less and reduce stockholding for market-leading results

## World-leading

World-leading performance for superior cure

## Dispersion

High surface area for wider, better dispersion

## Innovative Formulation

Innovative formulation for exceptional dispersion and easy addition

## Improved Strength

Vastly improved strength, cross-link density and cure

## Available Now!

Available immediately through our worldwide network

# Innovative Solutions, World Leading Products™

Formulating the Future

## Who Are We?

For over 20 years, Birch Chemicals has been delivering unrivalled products to the rubber, plastics, adhesives and coatings industries. Because we produce and refine all of our raw materials on site, we guarantee the high quality, consistency and traceability our customers have come to expect from us.

We're dedicated to innovation: that's why our Innovation Centres are consistently finding new ways to improve our products, lead times and formulas. And thanks to our global distribution network, Innovoh and other Birch Chemicals products are available worldwide.
